PROMPT STUDIO

Turn expert knowledge to AI prompts

Turn expert tasks into structured prompts with validation, grounding, and reusable package history — all from one guided workflow.

⬆️ Runs locally

✓ Quality-checked prompts

📁 Style + Grounding references

📄 Save and reuse prompts

STEP 1 • CURRENT

Persona

Choose the expert role and working scope.

STEP 2 • UP NEXT

Task & Grounding

Add the task, constraints, and reference material.

STEP 3 • UP NEXT

Review & Generate

Create, review, and export the final package.

STEP 1

Choose the professional persona

Select the expert point of view you want the prompt package to reflect, then describe how that role usually works.

Select an Expert Role:

- 🔴 🩺 Healthcare Expert (Doctor/Clinician)
- ⬜ ⚖️ Legal Professional (Attorney/Counsel)
- ⬜ 📊 Financial Analyst
- ⬜ 💻 IT Professional (Software Engineer)
- ⬜ 🔬 Researcher
- ⬜ 📈 Marketing Strategist
- ⬜ 💼 HR Professional
- ⬜ ✍️ Write Your Own (Custom)

What are their day-to-day responsibilities?

Example: Reviews safety compliance, writes incident reports, drafts remediation guidance...

STEP 2

Define the task and grounding inputs

Give the app the task, any constraints, and optional references so the final prompt package is easier to control and review.

Select a typical task:

Summarize complex documents

Business rules, formatting needs, or constraints

Example: Keep it under 250 words, cite the policy source, and flag unresolved risks.

Style grounding

Use style references for tone and structure

Upload up to 5 files to guide voice, heading patterns, vocabulary, and formatting. These references shape style only, not factual claims.

Manual style guidance

Example: Sound like a concise enterprise policy memo. Prefer short paragraphs and plain language.

Upload style references

Drag and drop files here

Limit 200MB per file • TXT, MD, PDF, DOCX

Browse files

Uploaded style references

No uploaded documents yet.

Factual grounding

Use factual references for evidence only

Upload up to 5 files that contain approved facts. The generated package will require source attribution and should separate evidence from assumptions.

Manual factual notes

Example: Internal policy summary, approved pricing language, or customer requirements.

Manual factual notes

What Happens If Notification Is Late

OCR has authority to impose civil monetary penalties for violations of the Breach Notification Rule. Penalties range from \$100 to \$50,000 per violation, depending on the level of culpability, with an annual cap of \$1.9 million per violation category. OCR has assessed penalties specifically for late notification in several recent enforcement actions. Riverstone does not need to add a late notification violation to what is already a difficult situation. The deadline is June 13. We will meet it.

Validation checklist

 System prompt opens with 'You are'

Commercial packages should declare role and scope immediately.

 Placeholder completeness

Some required schema fields do not appear as placeholders in the prompt template.

 Unsupported-domain escalation

Escalation policy should cover out-of-scope or regulated requests.

 Output schema completeness

Checks the downstream deliverable contract.

 System prompt length $\geq$ 120 words

153 words.

 Output contract present

Prompt should define required sections inline.

 PII and compliance checks

Safety policy should address privacy and compliance-sensitive content.

 Persona analysis is substantive

70 words.

 Behavioral constraints present

Checks for commercial safety and scope language.

 Source attribution enforced

Required for auditable factual grounding.

 Forbidden-claim protection

Package should prohibit fabricated facts, citations, or approvals.

System Prompt

You are Margaret L. Haines, J.D., Senior Healthcare Privacy Counsel. Your role scope includes providing expert guidance on HIPAA compliance, breach notification, and incident response for healthcare organizations across Virginia, D.C., and the District of Columbia.

To provide actionable guidance, please respond with a clear summary of the breach notification memo's key points, including the 60-calendar-day notification clock, the presumption of breach, and the scope of the affected population. Please ensure your response is concise and informative, reflecting Margaret's pragmatic approach to complex regulatory issues.

Copy System Prompt

User Prompt Template

Please provide a summary of the breach notification memo for Riverstone Health System, including:

- * The 60-calendar-day notification clock
- * The presumption of breach
- * The scope of the affected population (including patient count and geographic distribution)
- * Immediate recommended actions (such as convening a breach response team, preserving forensic evidence, and engaging cyber insurance carriers)

Please respond in plain language, using the following placeholders: [PLACEHOLDER_NAME] will be replaced with specific values.

Copy User Prompt

=== SYSTEM PROMPT ===

You are Margaret L. Haines, J.D., Senior Healthcare Privacy Counsel. Your role scope includes providing expert guidance on HIPAA compliance, breach notification, and incident response for healthcare organizations across Virginia, D.C., and Maryland. You accept data sources from reputable health systems, insurers, digital health companies, research organizations, and vendors. Grounding your responses in credible sources, including the OCR web portal and relevant federal regulations, is essential. When uncertain or out of scope, you will label uncertainty and escalate to ensure accurate and compliant advice.

To provide actionable guidance, please respond with a clear summary of the breach notification memo's key points, including the 60-calendar-day notification clock, the presumption of breach, and the scope of the affected population. Please also outline immediate recommended actions, such as convening a breach response team, preserving forensic evidence, and engaging cyber insurance carriers.

Your output should be concise, yet informative, reflecting Margaret's pragmatic approach to complex regulatory issues.
